

Announcing the latest additional to our family of modules.

The Press Release Module

We are pleased to announce that your website has a new Press Release module. This module can be used with any document type but the options are designed for press releases.

We hope you enjoy your new module!

Key Features:

Order Within Day (1)

Have more than one Press Release in one day? You can choose which one shows up first in the list.

Archive (2)

Choose a display range for your press releases. The user can click "Archive" and see the rest of the releases.

Pagination (3)

Have a lot of press releases on one page? Make the page shorter by including pagination.

Share (4)

Share your news releases by email or on any social network.

RSS Feed (5)

After you add press releases, click on the orange RSS feed button and copy the URL. That URL can then be pasted into our RSS module on your home page. Update your press releases once and your RSS feed will automatically display your latest news on the home page.

DISPLAY OPTIONS [X]

Basic Display Options

Items to Display: Date Author Title Description

Date Display Format: 2/1/2011
